

Family Learning Session 4 - Earth

Solar System and Beyond STEM course.

We investigated Earth today and using our maths skills we peeled the surface of the earth off, like we would peel an orange, and calculated what percentage of the Earth's surface is land and water = 71% of Earth's surface is water!

We also used Technology to track the International Space Station (ISS) to locate its position from where we were on Earth so we can watch it at night in the sky. We then used Vinegar and Bicarbonate of Soda to re-create Earth's gases in a science experiment using our senses to explore the results of the chemical reaction!
